SUBJECT: TELECONFERENCE WITH STAKEHOLDERS WITH AN INTEREST IN
GUIDANCE RELATED TO EXTENDED STORAGE OF LOW-LEVEL
RADIOACTIVE WASTE

DATE & TIME: Tuesday, September 20, 2011
10:00 am - 11:00 am

LOCATION: Interested members of the public can participate in this meeting via a toll-free audio teleconference. For details, please call the U.S. Nuclear Regulatory Commission (NRC) meeting contact listed on the NRC web site or call the NRC operator (toll free 1 (800) 368-5642) and ask to be connected to the meeting contact (James Shaffner).

PURPOSE: This is a meeting of a NRC working group that was convened in order to allow subject matter experts and stakeholders an opportunity to review and assess the adequacy of NRC guidance related to extended storage of low-level radioactive waste (LLRW) by all types of licensees. The completion of Regulatory Issue Summary (RIS) 2011-09 on August 16, 2011 was a milestone in this process. The primary focus of this meeting will be afford participants the opportunity to identify documents that are useful regarding extended storage of LLRW that should be included on the new electronic link, alluded to in the RIS, developed to present such information on NRC's Public website. Meeting participants will also address the need to develop a NUREG containing consolidated extended storage guidance for LLRW in light of recent developments regarding disposal access.
