Hello Shannon:

We are not starting the acceptance review until early May due to resource constraints. We will complete that within 60 to 90 days, after which we will publish an opportunity for hearing in the Federal Register and on our website. I don't think we'll be issuing a press release. Feel free to keep checking in with me.

Steve

Hi Steve,

I was wondering if you had an anticipated timeframe for finishing up the completion review for the Strata Energy ISL uranium application. Will you be sending out a press release regarding the opportunity to request a hearing/intervene in the licensing proceedings via the NRC press release list? I am on that list – we just want to make sure we catch the federal register notice.

Thanks, Shannon
