Regulatory

File Cy.

Mr. George Lear, Chief
Operating Reactors Branch 3
Division of Operating Reactors
Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Lear:

Your letter of March 18, 1977 confirmed that there were no unique aspects of the Duane Arnold Energy Center which precluded machining of two alternate bypass holes in the lower tie plates of irradiated fuel assemblies.

This letter is to confirm (as discussed in a phone conversation between J. Wetmore, NRC and Karl Meyer) that reference in the above referenced letter to only 7 x 7 irradiated fuel assemblies was inadvertent and that the letter should have referred also to 8 x 8 irradiated fuel assemblies.

Very truly yours,

A handwritten signature in dark ink, appearing to read "Lee Liu".

Lee Liu
Vice President, Engineering
