Subject: Docket ID NRC-2011-0136

Ms. Gallagher,
Docket ID NRC-2011-0136

Revision 2 of the TSTF-510 provides description of intervals and periods.
In ASME codes, Periods combined make up an Interval. The Intervals are 10 years.
The NRC has suggested that Intervals combined make up a Period. Is there a basis for not using similar terminology as the ASME code, since it is familiar to inspection personnel?
