Subject: Docket Number 52-025-COL and 52-026-COL

To the Nuclear Regulatory Commission

Regarding application for Construction and Operation of Additional Power Reactors for Plant Vogtle, Burke County, Georgia

Dear Sirs:

I am the Mayor of North Augusta, South Carolina a community of some 21,500 bordering Augusta, Georgia and the nearby

Plant Vogtle power facility. Our entire area is well informed about the nuclear industry as we have both commercial nuclear plants and the Savannah River Site located close by.

Plant Vogtle has been operated for years in a safe and efficient manner. While Vogtle provides jobs to our area and is a much appreciated corporate citizen and taxpayer, more importantly it provides energy which will help make our nation energy self sufficient and less dependent on unreliable foreign sources.

Without reservation, I believe the vast majority of the citizens of my community approve the permitting of the additional reactors for Plant Vogtle. On behalf of my community, I ask that the NRC properly review and authorize the required permits.

Sincerely,

Lark W. Jones
Mayor, City of North Augusta, South Carolina
