ATTN: Paul E. Bridges  
Radiation Safety Officer  
P.O. Box 1126  
803 Mill Road  
Lewiston, Idaho 83501

SUBJECT: LICENSE RENEWAL (**CORRECTED COPY**)

Please find enclosed corrected copy to Amendment Number 11 to NRC License Number 11-27075-01 **renewing this license in its entirety and making corrections as described below.**

1. **Condition 7.A., has been corrected to include Amersham source model CDC.91 and CDC.92. The corresponding sealed source and device registration (SSDR) certificate for these model numbers is MA-1059-S-368-S, according to information provided by QSA Global (Amersham).**
2. **Condition 7.D., has been corrected to include Amersham source model AMC.P6 (serial 6674LQ). The corresponding SSDR certificate for this model number is MA-1059-S-163-S, according to information provided by QSA Global (Amersham).**

**Please note that Amersham model CO-0822 was not included in the renewed license since the NRC could not find the corresponding SSDR certificate. You need to contact the manufacturer or distributor and request that a copy of the corresponding SSDR certificate be sent to you. You also need to submit to the NRC a request to amend this license to add model CO-0822, and include copy of the SSDR certificate.**

**Please note that this letter acknowledges that you have provided to the NRC your general license registration information on E-mail dated August 26, 2011.**

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14)(viii). You should review the enclosed document carefully and be sure that you understand all conditions. You can contact me at 817-860-8189 if you have any questions about this license.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through NRC's electronic document repository (ADAMS). The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/>. Pursuant to NRC's RIS 2005-31, the enclosed materials license will not be made publicly available.

NRC expects licensees to conduct their programs with meticulous attention to detail and a high standard of compliance. Because of the serious consequences to employees and the public that can result from failure to comply with NRC requirements, you must conduct your radiation safety program according to the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate by NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers: Inspection and Investigations," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Notify NRC in writing of any change in mailing address.
3. By 10 CFR 30.36(d) and/or license condition, notify NRC, promptly, in writing, and request termination of the license:
  - a. When you decide to terminate all activities involving materials authorized under the license whether at the entire site or any separate building or outdoor area;
  - b. If you decide not to acquire or possess and use authorized material; or
  - c. When no principal activities under the license have been conducted for a period of 24 months.
4. Request and obtain a license amendment before you:
  - a. Change Radiation Safety Officers;
  - b. Order byproduct material in excess of the amount, radionuclide or form authorized on the license;
  - c. Add or change the areas or address(es) of use identified in the license application or on the license; or
  - d. Change the name or ownership of your organization.

An electronic version of the NRC's regulations is available on the NRC Web site at [www.nrc.gov](http://www.nrc.gov). Additional information regarding medical uses of radioactive materials may be obtained on the NRC Web site at: <http://www.nrc.gov/materials/miau/med-use-toolkit.html>. This site also provides the updated Training and Experience NRC Form 313A series of forms and guidance, as well as information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

**/RA/**
