Docket No: 50-331  
Op. License No: DPR-49  
Revision of letter regarding commitments for Main  
Steam Isolation Valve CV-4419  
Reference: Letter, D. L. Mineck (Iowa Electric) to Dr. T.E. Murley  
(NRC) dated June 24, 1991, NG-91-1594  
File: A-117, N-11

Dear Dr. Murley:

It is necessary to amend the referenced letter. TS 4.7.D.1.b(2) requires only a closure test, not a closure and reopening test. However, we will measure both the closure and reopening times of the valve. Also, steam tunnel temperatures are read once per day, not once per shift as previously stated. The revised letter is provided in the attachment.

If you have any questions regarding this matter, please contact this office.

Very truly yours,

Daniel L. Mineck  
Manager, Nuclear Division
