Good morning Jackie,

I wanted to make sure that you received Dr. Rubin's letter.

One thing that was alluded to on my CV, but not emphasized was that I am a Certified Industrial Hygienist (CIH). If you are not familiar with it, certification requires passing an exam assesses knowledge on a variety of subjects. One of the rubrics (i.e. subject areas) is ionizing radiation. Below is the 'definition' of this rubric:

**Radiation/Ionizing**

Physical characteristics and health and biological effects associated with alpha, beta, gamma, neutron and xradiation, including source characteristics. Includes exposure measurement, evaluation, and control.

More information about the CIH can be found at:

<http://www.abih.org/certified/examinees/contentdomain.html>

Please let me know if you require any additional information.

Scott

Scott:

That is fine. I will be in the office tomorrow from 7:30am-4:15pm CST. I just want to confirm that the RSO's training and experience include the types and quantities of licensed material to be authorized on the license.

Please let me know what time will be convenient for you.

Thanks,

Jackie

Jackie,

Can Dr. Ray Guilmette and I call you tomorrow about my experience and LRRI's options with regard the RSO position while we seek a replacement Health Physicist/RSO? What would be some good times for you?

Scott
