Documents Title in ADAMS)

10:15 and 10:44 I left messages for Mssrs. Kovacs and Digioia to return my call.
11:15 Mssrs. Kovacs and Czako returned my call. They were concerned about how requests by customers to return product should be handled and how product should be handled prior to distribution. Items distributed to customers are exempt from the regulations in terms of radioactive material content. The items may be disposed of without regard to radioactivity though the mercury content may require special handling. Items in-house prior to distribution are not considered exempt from the regulations. The licensee's response letter dated August 18, 2011, covers situations involving defective and broken items. I brought up one more issue regarding training for personnel. Page 3, Item 7, of the August 18, 2011, response letter indicates that refresher training will be provided periodically. I informed the licensee that periodic refresher training should be provided on an annual basis and that I would not require them to send in a response letter.
