Lenny, Bhalchandra,

I will need to discuss w/you both (this week), RES' current thoughts on which plants (even those that have previously declined) that they still plan on pursuing for information on a NON-VOLUNTARY basis. Oconee and Grand Gulf, (Susquehanna and Calvert Cliffs as well) are being considered. Please note that THIS IS STILL PRELIMIARY INFORMATION, not to be discussed w/the licensee, and is being discussed internally at the RES Sr management and EDO level. I will keep you posted.

That said, can you give me any high level licensing activities that are in house or projected within the next year that you, as Plant Project Manager, think will challenge the licensee's efforts (resources) to support the project? For example, my licensee, Susquehanna, currently has EPU and license renewal reviews in-house. John Lubinski asked to gather this insight from the respective plant PMs so that he can provide that feedback to RES.

Thanks,
Rich
