**Subject:** License Renewal Environmental Review, South Texas Project Units 1 and 2 [Open Meeting/Records Request]

Mr. Neil Hudgins  
General Manager  
Coastal Bend/Coastal Plains Groundwater Conservation District

Subject: License Renewal Environmental Review, South Texas Project Units 1 and 2 [Open Meeting/Records Request]

Dear Mr. Hudgins:

Thank you for meeting with me and my team on July 12, 2011. The purpose of the meeting was to inform your office about the NRC staff review process of the STP Nuclear Operating Company (STPNOC) license renewal application for South Texas Project (STP), units 1 and 2, and to solicit pertinent information concerning groundwater use for the review. STPNOC submitted the application on October 28, 2010, in accordance with 10 CFR 54.17.

Based on our discussions, the staff requests that the Coastal Plains Groundwater Conservation District provides a list of all Shallow Chicot Aquifer and Deep Chicot Aquifer wells permitted by the District within 10 miles of STP, units 1 and 2 (i.e., use the coordinates N361,600, E2,945,000, or latitude 28.79388809 and longitude -96.05166626 as the center point or origin for the 10-mile radius). If possible, please also provide a map of these wells.

The requested information can either be mailed to the address below or e-mailed via replying to this e-mail distribution, if practicable.

Chief, Rules, Announcements and Directives Branch  
Division of Administrative Services  
Mailstop TWB-05-B01M  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

The staff greatly appreciates your time and hospitality. As indicated during the discussion, the staff has registered your e-mail to receive information concerning the staff review of the STP license renewal, including the Draft Supplemental Environmental Impact Statement (DSEIS) for your information. The DSEIS is scheduled to be issued in March 2012. Please contact me if you have any questions regarding this request.

Tam Tran  
Project Manager
