Control No: 575796

Dear Ms Gabriel,

This document is in response to your email of 9/2/2011. The items discussed are listed below:

1. We wish to keep the possession limit the same for item 8D. These seeds will replace other seeds being used. I do not feel it will increase our amount of implants.
2. We are proposing release criteria of 6 mR/hr for the Cs-131 patients. This is in line with ratio of half lives (10 days to 60 days) with I-125 and derived from calculations in Reg. Guide 8.39 equation 2.
3. We concur with your recommendations with the appropriate model number for the source.

I hope this response meets your needs with regard to the proposed amendment. If you have any additional comments please contact our Radiation Safety Officer at 7244542371 or by email

Sincerely,

Michael A King
