LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- ☒ 1. Based on the inspection findings, no violations were identified.
- ☐ 2. Previous violation(s) closed.
- ☐ 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, NUREG-1600, to exercise discretion, were satisfied.

_____ Non-cited violation(s) were discussed involving the following requirement(s):

- ☐ 4. During this inspection certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11

Statement of Corrective Actions

I hereby state that, within 30 days, the actions described by me to the inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

PROGRAM SCOPE

Professional Service Industries, Inc., (PSI) is an engineering firm with its corporate office in Oakbrook Terrace, Illinois. The company's NRC license authorizes the use, storage, and dispatch of portable moisture/density gauges from 12 locations listed in Condition 10 of the license. The license also authorizes their use at temporary job sites anywhere the NRC maintains regulatory jurisdiction. The company also maintains materials licenses from several Agreement States, including the State of Florida. The Corporate Radiation Safety Officer (RSO) is located at the corporate office, and is responsible for managing licensed activities at various authorized locations with the assistance of Site RSOs.

Performance Observations

At the time of this inspection, this office has no gauges. The inspector reviewed licensee leak test, inventory, training, and dosimetry records for all field offices. The RSO was informed that NRC was required to conduct inspections at several of the company's field offices as a part of our inspection requirements.
