Will do, Scott. I'll get the CDs to you first thing on Monday morning. Apologize for my delay in getting this quick request knocked out ...it's been one of those hectic weeks for me - as Acting BC w/ PM backup duties.

You bet. That can work Thanks a lot Rich. Mind dropping in the mail to me? I'll take the pdf file and extract the applicable chapters and then e-mail all of this to him.

Scott,

Attached is Ch.3 of FSAR for Surry. I have a copy of the latest PB FSAR; however, it is the complete FSAR in pdf file and exceeds 113MB. Can we send him a CD copy?

Subject: FW: Request for Specific FSAR Sections

Hi Rich,
As mentioned in Jimi's e-mail below we had a request from one of the peer review committee members (John Stevenson) to obtain copies of the Peach Bottom and Surry FSAR sections which describe the foundations of the plant containments. He is

M/74

specifically looking into what the effects of soil liquefaction during a seismic event may have on the structural stability of the the containment buildings.

In response to this request could you provide electronic copies of the applicable FSAR sections for the two plants? John mentioned that the information may be found in sections 3.7.1 and 3.8

Regards, Scott

One of the peer review committee members requested copies of some specific sections of either Peach Bottom's or Surry's FSAR. Lets seek Rich Guzman's help to make that happen.
