SUBJECT: SEABROOK STATION LICENSE RENEWAL APPLICATION REVIEW

Dear Ms. Simon:

The U.S. Nuclear Regulatory Commission (NRC) staff is reviewing an application to renew the operating license for Seabrook Station (Seabrook) Unit 1, which is located in Rockingham County, New Hampshire (NH), 13 miles south of Portsmouth, NH. Seabrook is operated by NextEra Energy Seabrook, LLC. As part of its review of the proposed action, the NRC staff has prepared a site-specific Supplemental Environmental Impact Statement (SEIS) to its "Generic Environmental Impact Statement for License Renewal of Nuclear Plants," NUREG-1437. The SEIS includes analyses of relevant environmental issues, including potential impacts to historic, archeological and cultural properties from extended operation and possible refurbishment activities associated with license renewal. Pursuant to 36 CFR 800.8(c), we are requesting your comments on the enclosed draft supplement and on our preliminary conclusions regarding historic properties.

The NRC staff has determined that the area of potential effect (APE) for a license renewal action is the area at the power plant site and its immediate environs that may be impacted by post-license renewal land disturbing operation or projected refurbishment activities associated with the proposed action. The staff views the APE for the Seabrook license renewal as including the Seabrook site and the immediate environs.

The NRC staff has conducted an environmental audit at the site and has reviewed historic and archaeological records. The NRC staff also contacted five Native American Tribes identified as having potential interest in the proposed undertaking. To date, no comments have been received.

In the context of the National Environmental Policy Act of 1969, under which the draft environmental impact statement was prepared, the NRC staff's preliminary determination is that the impact of license renewal on historical and archaeological resources is small, and additional mitigation is not warranted. Under the provisions of the National Historic Preservation Act of 1966, the NRC staff's preliminary determination is that no historic properties will be adversely affected by the proposed action.
