1. _____ IP 37060 09/14/11

TRAINING: Yes. Inspector training required prior to using this new inspection procedure.

1. REMARKS: (IP 37060, "10 CFR 50.69 Risk-Informed Categorization and Treatment of Structures, Systems, and Components Inspection) is being issued to allow NRC inspectors to verify that the licensee's programs and procedures have properly incorporated the license amendment under Title 10 of the Code of Federal Regulations (10 CFR) 50.69, "Risk-Informed Categorization and Treatment of Structures, Systems and Components for Nuclear Power Reactors." Inspectors will verify that the licensee has properly implemented the 10 CFR 50.69 categorization process for the structures, system, and components subjected to the 50.69 process and also verify tht the licensee has properly implemented the alternate treatment requirements for RISC-3 SSCs.

DISTRIBUTION: Standard
