Wadsworth, TX 77483

SUBJECT: SOUTH TEXAS PROJECT - NRC INITIAL OPERATOR LICENSING
EXAMINATION APPROVAL 05000498/2011301; 05000499/2011301

Dear Mr. Halpin:

The purpose of this letter is to confirm the final arrangements for the upcoming operator licensing examinations at South Texas Project.

The NRC has completed its review of the operator license applications submitted in connection with this examination and separately provided a list of approved applicants to Ken Struble, Operations Training Manager. Note that any examination waivers and application denials have been addressed in separate correspondence.

The NRC has approved the subject examinations and hereby authorizes you to administer the written examination in accordance with NUREG-1021, "Operator Licensing Examination Standards for Power Reactors," Revision 9, Supplement 1, on September 22, 2011. The NRC staff will administer the operating tests during the weeks of September 26 and October 3, 2011. This examination has undergone extensive review by my staff and representatives responsible for licensed operator training at your facility. Based on this review, I have concluded that the examination meets the guidelines of NUREG-1021 for content, operational, and discrimination validity. By administering this examination, you also agree that it meets NUREG-1021 guidelines, and is appropriate for measuring the qualifications of licensed operator applicants at your facility. If you determine that this examination is not appropriate for licensing operators at your facility, do not administer the examination and contact me at (817) 860-8159.

Please contact your Chief Examiner, Steve Garchow, at (817) 276-4426, if you have any questions or identify any errors or changes in the license level (RO or SRO) or type of examination (partial or complete written examination and/or operating test) specified for each applicant.

Sincerely,

A handwritten signature in dark ink, appearing to read "M. Haire", is written over a horizontal line.

Mark S. Haire, Chief
Operations Branch
Division of Reactor Safety
