NORTHERN STATES POWER COMPANY

MINNEAPOLIS, MINNESOTA 55401

November 13, 1974

Mr. J. G. Keppler, Regional Director
Directorate of Regulatory Operations
Region III
United States Atomic Energy Commission
799 Roosevelt Road
Glen Ellyn, Illinois 61037

Dear Mr. Keppler:

Monticello Nuclear Generating Plant
Docket 50-263 License DPR-22

We are happy to report that we completed the inspection of the reactor recirculation system's two 4-inch diameter bypass loops and the two 2-inch diameter valve equalizer loops at Monticello Nuclear Generating Plant as requested by your RO Bulletin 74-10, dated September 19, 1974, and found no rejectable indications.

The two 4-inch diameter bypass loops were visually inspected and all welds were ultrasonic examined. The two 2-inch diameter valve equalizer lines were visually inspected and all welds, which are socket welds, were liquid penetrant examined.

All inspection records have been made part of the Monticello's Inservice Inspection File. Even though your inspectors have reviewed these inspection records, we would be very happy to review any further details of our inspection with you.

Yours very truly,

A handwritten signature in dark ink, appearing to read "L. J. Wachter".

L. J. Wachter, Vice President
Power Production and System Operation
