NORTHERN STATES POWER COMPANY

MINNEAPOLIS, MINNESOTA 55401

March 8, 1974

Docket No. 50-263

Mr Dennis L Ziemann, Chief
Operating Reactors Branch #2
Directorate of Licensing
U S Atomic Energy Commission
Washington, DC 20545

Dear Mr Ziemann:

MONTICELLO NUCLEAR GENERATING PLANT E-5979
Postulated Pipe Failures Outside Containment

Your January 18, 1974 letter referencing our August 1973 report on the subject matter posed additional questions for our response. Although your letter requested our response by March 4, in a March 1 conversation with your Mr James Shea, our submission date was extended to March 11. Under separate cover we are forwarding forty (40) copies of the required answer information.

As indicated in the answer information, the plant modification to protect against feedwater pipe failures has been changed. The altered modification work, although of limited scope, cannot be completed during the first quarter of 1974 as indicated in our September 7, 1973 letter. As you know the plant will be shut down about March 15 for a refueling outage and is expected back in service by May 15, 1974. Our schedule is to have the feedwater line modification work completed prior to restart of the plant following the refueling outage.

Yours very truly,

E C Ward, Director
Engineering Vice Presidential Staff
