TELECOPIED 1/18/77

Mr Victor Stello, Director  
Division of Operating Reactors  
U S Nuclear Regulatory Commission  
Washington, DC 20555

Dear Mr Stello:

MONTICELLO NUCLEAR GENERATING PLANT  
Docket No. 50-263 License No. DPR-22

QA Reverification of Appendix K Analysis

On January 14, 1977 the NRC Project Reviewer for Monticello, R L Snaider, verbally requested that we document the results and effects of the Quality Assurance Reverification Program for Appendix K Analysis performed by General Electric.

We are in receipt of the letter from General Electric which states the following:

"The areas of concern identified by the NRC in their communication to you of January 14th have been reviewed by GE for your plant and there is no net effect on the Monticello reactor operating limits. The current MAPLHGR values in your technical specification are conservative and should continue to be used for compliance with 10 CFR 50.46, Appendix K."

Yours very truly,

L O Mayer, PE  
Manager of Nuclear Support Services
