U.S. ATOMIC ENERGY COMMISSION

MAIL CONTROL FORM FORM AEC-3265
(8-60)

NSP**NORTHERN STATES POWER COMPANY**

MINNEAPOLIS, MINNESOTA 55401

September 21, 1971

Dr Peter A Morris, Director
Division of Reactor Licensing
United States Atomic Energy Commission
Washington, DC 20545

Dear Dr Morris:

MONTICELLO NUCLEAR GENERATING PLANT E-5979
Docket No. 50-263
ECCS Analyses

As set forth in a recently issued interim policy statement, the AEC has adopted acceptance criteria for the performance of emergency core cooling systems (ECCS) in light water nuclear power plants. Your letter of July 19 requested that we furnish analysis information to confirm that the performance of the Monticello ECCS is in compliance with the criteria of Sections IV A and B of the statement.

The General Electric Company has completed the analyses which are responsive to the specific requirements outlined in your letter.

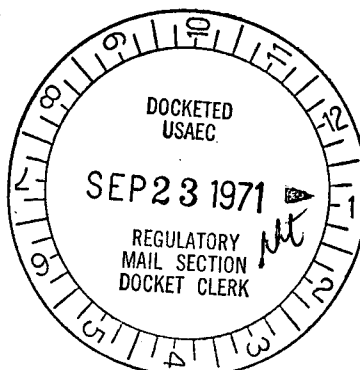

Enclosed are sixty copies of the analysis information which is required for your evaluation of the performance of the Monticello emergency core cooling systems.

Yours very truly,

E C Ward, Director
Engineering Vice Presidential Staff

Cc: Gerald Charnoff
