NORTHERN STATES POWER COMPANY

MINNEAPOLIS, MINNESOTA 55401

June 29, 1973

Mr. J F O'Leary, Director
Directorate of Licensing
United States Atomic Energy Commission
Washington, D C 20545

Dear Mr. O'Leary:

MONTICELLO NUCLEAR GENERATING PLANT
Docket No. 50-263 License No. DPR-22

Supplemental Information Relating to Torus Ring Header Supports

This letter is written to supplement our letter of January 12, 1973 to Mr. D J Skovholt which provided preliminary information on the Monticello torus ring header support design in response to his letter of December 13, 1972.

The results of General Electric tests and analyses to provide data to confirm the adequacy of torus and ring header design for dynamic loads are contained in General Electric Report NEDO-10859, "Steam Vent Clearing Phenomena and Structural Response of the BWR Torus." This report was submitted by General Electric to the Directorate of Licensing (John A Hinds to D J Skovholt) on May 10, 1973. We have confirmed with General Electric that this generic report is applicable to the torus, ring header and ring header support structures at Monticello.

General Electric Report NEDO-10859 addresses Items 1, 2 and 3 in Mr. Skovholt's letter of December 13, 1972.

Based on the adequacy of design as presented in NEDO-10859, we believe that no additional response is required for the remaining items in Mr. Skovholt's letter of December 13, 1972.

It is requested that NEDO-10859 be appropriately referenced in Docket No. 50-263.

Yours very truly,

L O Mayer, PE
Director of Nuclear Support Services
