Lecanto, Florida 34461

Subject: Levy Nuclear Plant
Emergency Support Certification

Dear Mr. Polisen:

As previously indicated in public announcements and meetings, Progress Energy Florida, Inc. is developing a Combined Operating License Application (COLA) for submittal to the U.S. Nuclear Regulatory Commission (NRC), in accordance with the requirements of 10 CFR 52 for the Levy Nuclear Plant site near Inglis, Florida. The COLA outlines Progress Energy's plans for construction and operation of two proposed power generating units at the new Levy site.

A key part of the COLA is the development of emergency plans which provide information sufficient to demonstrate compliance with pertinent regulatory requirements. These plans will take credit, to the extent practical, for the site, federal, state, and local plans already in place for other nuclear generating units in Florida.

The purpose of this letter is to certify that (1) Citrus County Fire Rescue would respond to requests for aid in firefighting resulting from emergency situations at the Levy Nuclear Plant and (2) Citrus County Fire Rescue will participate in future periodic drills and training, as required by the Levy Nuclear Plant Unit 1 and 2 Emergency Plan. The support that would be required of Citrus County Fire Rescue associated with the proposed new Levy Nuclear Plant is the same as now required in support for the existing Crystal River 3 Nuclear Plant.

This letter of intent shall remain in effect until superseded by a formal letter of agreement and may not be terminated by either party without 90 days written notice.

I am happy to answer any questions you may have and would appreciate your signature below if these terms are acceptable.
