MONTICELLO NUCLEAR GENERATING PLANT
Docket No. 50-263 License No. DPR-22

Reclassification of
License Amendment Request Dated February 18, 1987
APRM and IRM Scram Requirements

On February 18, 1987 we submitted for NRC review and approval a License Amendment Request related to APRM and IRM scram requirement Technical Specification changes. We requested that these changes be processed as exigent changes. The purpose of this letter is to withdraw our request for processing as exigent changes.

Based on discussions with the Monticello NRC Licensing Project Manager in the Office of NRR, an exigent classification may not be appropriate for these changes. We ask, however, that the subject License Amendment Request be processed on an expedited basis to relieve us of the requirement to place the plant in a "half-scram" condition for instrumentation surveillance and testing.

Please contact us if you have any questions related to this request or if additional information is required to supplement it.
