Addendum No. 1 to Detailed Control Room Design Review Summary Report

Reference: (a) NSP letter dated December 30, 1986 with attached report,
"Detailed Control Room Design Review Summary Report"

(b) NSP letter dated March 4, 1987, "Supplement 1 to NUREG-0737,
Generic Letter 82-33, Detailed Control Room Design Review
Summary Report - Additional Information

The purpose of this letter is to provide additional information related to the Monticello Detailed Control Room Design Review (DCRDR) Report originally submitted for NRC Staff review in References (a) and (b).

In the original report a number of human engineering deficiencies (HED's) required further review. We provided our commitment to provide the results of this review at a later date. The areas requiring further review included the annunciator system, the off gas system, and the traversing in-core probe system.

In addition, review of our original submittal has identified a number of corrections that should be made.

The attached documents, "Monticello DCRDR Summary Report Addendum 1" and "Monticello DCRDR Appendix G" provide the resolution of the remaining HED's. Appendix G is formatted to identify the HED, describe the resolution of the HED, and the location in the original report where additional information on the HED can be found.
