Status of Compliance with NUREG-0737 & Supplement No. 1

Reference: (a) Letter from T E Murley, Director, NRR,
transmitted by facsimile on April 14, 1989

The purpose of this letter is to provide you with the information requested in Reference (a) related to completion of TMI Action Plan requirements.

All significant licensee required TMI Action Plan backfit actions have been completed at the Monticello and Prairie Island Nuclear Generating plants with the exception of control room human factors improvements. Because of the complexity and scope of this work, several more refueling outages will be required to complete all of the planned work. Specific schedules have been provided to the NRC Project Managers for Monticello and Prairie Island.

We will not be able to return the marked up tables provided with your letter by April 18, 1989 as you requested. Our staff will be participating in the NRC Regulatory Information Conference beginning on April 18, 1989 in Washington, DC. Similar updated status information contained in the NRC SIMS system has been confirmed by Northern States Power Company on several occasions. We believe this information is redundant to the information provided in the tables accompanying your April 14th letter.
