Welcome to the Web Site of the Environmental Impact Statement for the Champlain Hudson Power Express Project

Welcome to the online home of public information and involvement for the Champlain Hudson Power Express Transmission Line EIS.

The United States Department of Energy (DOE) is preparing an environmental impact statement (EIS) to evaluate potential environmental impacts associated with the proposed Champlain Hudson Power Express (CHPE) transmission line between the U.S. and Canada. The purpose of this web site is to provide up-to-date EIS-related information to the public and other interested parties.

DOE has determined an EIS to be the proper National Environmental Policy Act of 1969 (NEPA) compliance document. The EIS will only address potential impacts in the United States; NEPA does not require an analysis of environmental impacts that occur within Canada. The EIS, however, will evaluate all relevant environmental impacts within the U.S. related to or caused by project-related activities in Canada.

Latest News

NEW!

July 7, 2011: DOE receives an update to Presidential Permit PP-362. This update is available in the [Document Library](#).

June 8, 2011: The Dept of State Conditional CZMA Consistency Certification has been posted and may be found in the [Document Library](#).
