Subject: Assistance with Regulations to Supply Into the Nuclear Sector

I am seeking information under the Freedom of Information Act and the Privacy Act as appropriate related to certifications and requirements for vendors to supply products into the nuclear power sector.

My name is Mark Trump

I work at: CCS-Inc. located at 105 Industrial Drive, Christiansburg, Virginia, 24073

I live at: (b)(6)

My e-mail address is: mtrump@ccs-inc.com

My phone numbers are:

Work (days): 540.382.4234 x123

Mobile: (b)(6)

Home (nights):

FOIA/PA REQUEST

Case No.: 2012-0105

Date Rec'd: 1/4/12

Specialist: Helgore

Related Case: _____

Background on CCS and FoxGuard Solutions:

CCS is the supplier of industrial computers, networking equipment and other IT hardware for use on control systems on power plants and other critical infrastructure. Our customers include large OEMs that supply control systems and power generation equipment in the fossil, oil and gas, wind and other energy industries. Following 9/11, we began the development of security solutions and mitigation strategies for IT related devices that reside on the nation's critical infrastructure. In 2009, we formed FoxGuard Solutions, a subsidiary corporation of CCS focused on the delivery of these security solutions and services.

Since then, we began working with end users and provide security assessment and mitigation strategies including hardware and software solutions. We have not delivered solutions for use on the safety systems or the reactor side of nuclear power but are interested in moving in that direction.

Description of Request:

I'm researching to identify the requirements that we must meet that as a supplier of industrial controls and other IT related equipment used on plants to supply product into the nuclear sector in general. Can you assist by providing the certifications, clearances, resource and facility requirements must be met to supply product into this sector or a contact to work with on the same? It is our goal to develop a corporate strategy around the supply of industrial hardware, services and security mitigation to meet the stringent requirements of the nuclear sector. But first, we must conclusively understand what organizational and infrastructure changes must be made to deliver solutions into this sector.

I appreciate your assist and look forward to your reply.

Respectfully,

Mark Trump

Subject: RE: Assistance with Regulations to Supply Into the Nuclear Sector

Our office received the below request for information. This is not considered a FOIA Request.

In making your request you should be as specific as possible. All FOIA requests must be in writing and, at a minimum, should contain the following basic elements:

- **State that you are seeking access to records under the Freedom of Information Act** (or under the Freedom of Information Act *and* the Privacy Act).
- Include your name, address, email address (if available), and daytime telephone number (in case we need to contact you to discuss your request).
- Describe the requested records (or information) as specifically as possible, including individual and company names (where applicable), as well as the relevant dates, places, events, subjects, and other details.
- **Individuals seeking records about themselves** must provide verification of their identity by a signature, address, date of birth, employee identification number (if any), and one other item of identification such as a copy of a driver's license or other document. **Persons requesting records pertaining to another individual**, in addition to furnishing verification of identity of the individual, must have the individual's written consent for the records to be disclosed to them.
- State your willingness to pay the applicable fees, if any, associated with processing your FOIA request. (See Fees.)

Additional information is available at <http://www.nrc.gov/reading-rm/foia/foia-request.html#how>.

Please resubmit your request.
