Bob,

Attached is a teleconference summary from the call held January 12, 2012 pertaining to the Indian Point license renewal application. This is being forwarded to you to ensure that the comments attributed to Entergy have been properly captured. If Entergy would like to provide comments on the attached please do so by January 25, 2012.

LICENSEE: Entergy Nuclear Operations, Inc.

FACILITY: Indian Point Nuclear Generating Station, Units 2 and 3

SUBJECT: SUMMARY OF CONFERENCE CALL HELD ON JANUARY 12, 2012,  
BETWEEN THE U.S. NUCLEAR REGULATORY COMMISSION AND  
ENTERGY NUCLEAR OPERATIONS, INC., CONCERNING THE REACTOR  
VESSEL INTERNALS PROGRAM AT INDIAN POINT NUCLEAR GENERATING  
STATION, UNITS 2 AND 3

Representatives of the U.S. Nuclear Regulatory Commission (NRC or the staff), and representatives of Entergy Nuclear Operations, Inc., (Entergy or the applicant), held a conference call on January 12, 2012, to discuss the applicant's aging management activities for the reactor vessel internals (RVI) at Indian Point (IP) Nuclear Generating Station, Units 2 and 3. These activities consist of the RVI Program, which was submitted to the NRC as part of License Renewal Application Amendment 9 by letter dated July 14, 2010, and the RVI Inspection Plan, which was submitted to the NRC by letter dated September 28, 2011.

By letter dated August 22, 2011, the applicant stated, "Following issuance of MRP-227-A, Entergy will review the inspection plan to determine the need for revision, and will modify the inspection plan to include the necessary revisions, if any." MRP-227-A was issued by the Electric Power Research Institute (EPRI) in December 2011. Therefore, the staff inquired if the applicant was aware that MRP-227-A was issued, whether the applicant had reviewed MRP-227-A, and when the applicant planned to address any differences between MRP-227-A and IP's RVI Program and RVI Inspection Plan. The applicant indicated that it was in the process of reviewing MRP-227-A and would notify the staff of its plan and schedule to address any necessary revisions to its RVI Program and RVI Inspection Plan based on the issuance of MRP-227-A. With respect to two plant-specific action items for which the information was not provided in the IP RVI Inspection Plan, both of which require plant specific acceptance criteria or analyses for particular components, the applicant indicated that the Pressurized Water Reactor Owners Group (PWROG) is in the process of developing generic guidance for developing the criteria or analyses for these items, and that Entergy would defer providing the response for these items until the PWROG completes its generic work.

Subsequent to the teleconference, Entergy contacted the IP license renewal project manager and indicated that Entergy would submit a letter by February 27, 2012, that would provide necessary revisions to the IP RVI Program and RVI Inspection Plan based on the issuance of MRP-227-A.

The applicant had an opportunity to comment on this summary.

Robert F. Kuntz, Sr. Project Manager  
Projects Branch 2  
Division of License Renewal  
Office of Nuclear Reactor Regulation

Docket Nos. 50-247 and 50-286

Enclosure:  
List of Participants

cc w/encl: Listserv
