To Whom It May Concern,

In reference to the proposed Duke's Lee Nuclear Station: Have we not had ample proof in this last calendar year that nuclear power is a thing of the past? Did the ongoing disaster at Fukushima Daichi have no impact on our civic mind? The floods of toxic sludge from coal lakes? There are other, cleaner sources of power that do not leave permanent and potentially lethal scars on our environment, our families, and our children. Is it not time for us to reach out and grasp the brighter future before us, rather than grubbing about for whatever we can find now, even if it will endanger those it is purported to serve?

No, NO, and NO, to the Duke's Lee Nuclear Station.

Thank you.

Sincerely,

H. Tinnaro
