Dear Lee Colaeis,

With the immense amount of scientific evidence as well as experiential data from scores of nuclear power plants around the world confirming how dangerous nuclear power is and always will be in multiple aspects, how can any sane person consider building more nuclear power plants?? As a very concerned resident of nearby Hendersonville, NC, I wish to register strong objection to building a plant in Gaffney, SC. There is no possible justification for endangering hundreds of thousands of human beings in the radius around Gaffney that will have their health seriously damaged by the production of nuclear power at this proposed facility. I look forward to hearing that this ill-conceived project has been cancelled.

With profound conviction,
Martha N Howell
