Subject: I oppose new nuclear facilities

I am writing in regards to a proposed nuclear facility in Gaffney, SC. I do not want to buy power generated from nuclear power. I think that the reactive waste is a problem that no states wants to store because of its toxic nature to people and other organisms. Nuclear power plants are expensive to construct and maintain. Precious water resources are needed in order to cool nuclear reactors. For all of these reasons, I would be more in support of energy conservation efforts and education and less toxic forms of energy production like wind and solar.

Sincerely,
Barbara Sloss
