As a small business in Hendersonville, NC, we rely on the tourists visiting from Gaffney, SC, and throughout the South East to make our living. These visitors are needed not only by us but by many other small businesses in Western North Carolina. One of the charms that bring people here is the pristine water, cool mountains and peaceful and safe environment. We cannot afford to risk polluting our rivers, releasing radiation and making people fearful of possible dangers. While knowing that energy alternatives are necessary, perhaps we should look to more benign sources such as solar to meet our needs.
