Resume of Laura M. (Quinn) Willingham

Education: B.S. – Environmental Sciences, Frostburg State University, 2004 (cum laude)

Experience: **U.S. Nuclear Regulatory Commission, 2005 – Present**

2009 – Present

I am Project Manager in the NRC's Office of New Reactors. I oversee staff and contractor teams for the Calvert Cliffs Nuclear Power Plant Unit 3 combined license application (COL). I am responsible for preparing and publishing the environmental impact statement for the Calvert Cliffs COL application; conducting public meetings; and interacting with other Federal, State and local agencies, the applicant and members of the public regarding the environmental review for the Calvert Cliffs COL application.

2005 – 2009

I was a Project Principal Support/Co-Project Manager in the Office of Reactor Regulation, Division of New Reactor Licensing and the Office of New Reactors, Division of Site and Environmental Reviews. I supported the management of staff and contractor teams on the environmental reviews of the North Anna; Vogtle; and Clinton early site permit applications. I also supported the combined license applications for Calvert Cliffs Unit 3, Fermi Unit 3, North Anna Unit 3, and Levy County Units 1 and 2. During this time, I supported the lead environmental project manager for the above projects in preparing and publishing the environmental impact statements, conducting public meetings, interacting with Federal, State, and local agencies, the applicants, and members of the public with regard to the environmental reviews.

Alliant Tech Systems, Summer 2004

I worked for Alliant Tech Systems, a Department of Defense contractor, in the Department of Safety and Environmental Compliance as a summer intern. During my internship, I supported the research of a possible onsite wastewater system to separate emulsified oil and other chemical compounds from ammo manufacturing machine wastewater so that the waste could be properly disposed of through the onsite wastewater treatment facility.

Alliant Tech Systems, Summer 2003

I worked for Alliant Tech Systems, a Department of Defense contractor, in the Department of Safety and Environmental Compliance as a summer intern. During my internship, I updated and revised all of the Material Data Safety Sheets which are required for manufacturing facilities under the Occupational Safety and Health Administration's Hazard Communication Standard. I also

supported the facilities' compliance of the Clean Air Act by calculating air emission data sheets for certain air emission release points that are recorded and inspected by the West Virginia Department of Environmental Protection.

Alliant Tech Systems, Summer 2002

I worked for Alliant Tech Systems, a Department of Defense contractor, in the Department of Safety and Environmental Compliance as a summer intern. During my internship, I conducted surveys and created engineering drawings of potable water piping in over 150 buildings. The survey recorded the locations and sizes of piping and was used to install back pressure valves to ensure that the potable water system would not be contaminated by waste products if water pressure was lost.

Publications: Final Environmental Impact Statement for the Combined License for Calvert Cliffs Nuclear Power Plant Unit 3 (NUREG-1936) – May 2011

Draft Environmental Impact Statement for Combined Licenses for Levy Nuclear Power Plant Units 1 and 2 (NUREG-1941) – August 2010

Draft Environmental Impact Statement for the Combined License for Calvert Cliffs Nuclear Power Plant Unit 3 (NUREG-1936) – April 2010

Final Supplemental Environmental Impact Statement for the Combined License for the North Anna Power Station Unit 3 (NUREG-1917) – February 2010

Draft Supplemental Environmental Impact Statement for the Combined License for the North Anna Power Station Unit 3 (NUREG-1917) – December 2008

Final Environmental Impact Statement for an Early Site Permit at the Vogtle Electric Generating Plant Site (NUREG1872) – August 2008

Draft Environmental Impact Statement for an Early Site Permit at the Vogtle Electric Generating Plant Site (NUREG1872) – September 2009

Final Environmental Impact Statement for an Early Site Permit at the North Anna Site (NUREG-1811) – December 2006

Final Environmental Impact Statement for an Early Site Permit at the Exelon Site (NUREG-1815) – July 2006
