Subject: Waste Confidence Proposal

The idea of San Onofre Nuclear Generating Station producing an average 500 pounds a day of highly radioactive "spent" nuclear fuel and storing it indefinitely within two miles of San Clemente's city limits is repulsive to citizens here who are aware of this outrage.

If the NRC doesn't begin soon to demonstrate that it is truly in the business of protecting the public and the planet from dangers posed by nuclear power generation—instead of its present mission of protecting and promoting the nuclear-power industry—you will trigger a massive movement to disband NRC and replace it with an industry watchdog with real teeth.

Stop SONGS, Edison's cash cow, from defecating in our backyard.
