SUBJECT: SUMMARY OF THE DECEMBER 13, 2011, PUBLIC MEETING
 WITH DETROIT EDISON TO DISCUSS THEIR PENDING
 RESPONSE TO OUTSTANDING REQUEST FOR ADDITIONAL
 INFORMATION 10.04.07-1 RELATING TO THE DETROIT
 EDISON COMBINED LICENSE APPLICATION FOR FERMI
 UNIT 3

The purpose of this meeting summary is to briefly describe the meeting, its participants and document the meeting materials.

On December 13, 2011, a public meeting was held between the U.S. Nuclear Regulatory Commission (NRC) staff and the combined license (COL) applicant, Detroit Edison (DTE). A meeting notice was issued on December 1, 2011, and was documented in the Agencywide Documents Access and Management System (ADAMS) under Accession Number ML113330799. The purpose of the meeting was for the applicant's to discuss technical issues that would support their pending response to Request for Additional Information (RAI) 10.04.07-1 under Accession Number ML113050347. DTE provided a non-proprietary presentation entitled, "Meeting with NRC on RAI 10.04.07-1 Regarding Condensate & Feedwater Supplemental Information." At the close of the meeting, NRC was comfortable with DTE's approach to responding to the RAI 10.04.07-1 but would need to review the written response accordingly. DTE stated that NRC should receive a full written response by December 15, 2011.

This Category I meeting was open to the public in its entirety. The meeting closed at approximately 3:00 p.m. after public comments were discussed. Enclosed with this memorandum are materials relevant to this meeting as follows: RAI 10.04.07-1 (ML113050347), the meeting attendee list (ML120300636) and DTE's non-proprietary presentation slides (ML120300640). The NRC staff thanked the participants for their participation. Please direct any inquiries to me, at 301-415-3104, or Michael.Eudy@nrc.gov.
