Hello!

I request as a concerned citizen that you do NOT approve permits for the William States Lee III Nuclear Station!

I support energy conservation, efficiency, and safe, renewable energy sources and want to see these promoted instead.

Nuclear power plants use gargantuan amounts of water to cool the reactors. Fresh, clean water is a basic human right and is better reserved and protected for people to drink, cook, and bathe; not for unsafe, expensive, finite energy production.

Nuclear energy is dangerous to people and the environment starting with the mining process through to the disposal of radioactive waste.

Let us not succumb to the status quo of using non-renewable resources to satisfy our need for electricity. There are myriad alternative solutions that we must work together to support and implement, regardless of the pressures of power and profit.

Thank you,  
Carolyn Raleigh
