SUBJECT: STAMFORD HOSPITAL, LICENSE AMENDMENT, CONTROL NO. 576364

Dear Ms. Silard:

This refers to your license amendment request. Enclosed with this letter is the amended license adding the new facility at 80 Mill River Street, Stamford, Connecticut. This amendment is being issued concurrent with issuance of the license termination of License Number 06-30571-01 held by The Heart Physicians. Please note the following:

1. We understand from discussions with Ms. Sarah Bull, your Radiation Safety Officer that the new facility is equipped with a well chamber attached to the dose calibrator for measuring wipes. Please inform us immediately if our understanding is incorrect.
2. The dose calibrator linearity test form continues to reference the incorrect suite number for the new facility. Please update all forms to include the correct suite number.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).
