Re: Request for License Amendment, License Number: 20-27648-01

Dear Team,

Thank you for taking time to speak with me today. Your insight was extremely helpful. GeoTesting Express (GTX) will be decommissioning one of its nuclear density gauges (Troxler Model: 3411B, SN: 5086). In addition, we will be adding two additional Troxler Model: 3430 density gauges. The gauge we will be decommissioning and the additional gauges we will be purchasing have the same radioactive sources:

Americium-241: Be	40 millicuries
Cesium-137	8 millicuries

Therefore, we'd like to increase the maximum possession limit for our company to the following amounts:

Americium-241: Be	40 millicuries per source, 220 millicuries total
Cesium-137	8 millicuries per source; 45 millicuries total

Please call or e-mail me if you have any questions or require additional information. I may be reached by telephone directly at 978-893-1229 or by e-mail at gtt@geotesting.com. Thank you.

Respectfully yours,

Gary T. Torosian
Vice President and
Director of Testing Services
