Name of Licensee:

Gamma Irradiator Service (GIS)

Name of Participant(s):Doyle Terry Stout, President and RSO for GIS
Kathy Dolce Modes, Sr. Health Physicist for NRC**Telephone No.**

570-925-5681

Subject:

12/9/2011 amendment request, 12/22/2011 RAI, and CAL 1-11-001

(NOTE: This will be used as the
Documents Title in ADAMS)

This amendment request deals with a major revision to the licensee's Radiation Safety Manual. The submittal was not adequate. The submittal should have included step-by-step operating procedures. The RAI letter dated 12/22/2011 had 27 questions that the licensee needs to address before re-submitting. The licensee has to gather all of the operating procedures, revise the amendment request, have his third-party review, follow 10 CFR 2.390 for any information he wants to be withheld from public disclosure, and re-submit to the NRC. This is going to take some time and rather than be under a deadline and rush through this process, it was agreed that the reviewer will void the license action.
