Wilmington, NC 28402

SUBJECT: ACCEPTANCE REVIEW OF GLOBAL NUCLEAR FUEL – AMERICAS'S REVISED
INTERGRATED SAFETY ANALYSIS SUMMARY (TAC NO. L33204)

Dear Mr. Murray:

This is in response to your letter SPM 12-004 dated January 30, 2012, by which you transmitted the changes to the Integrated Safety Analysis (ISA) records and onsite documentation, as well as Revision 14 of the site-wide ISA Summary for the Wilmington, North Carolina facility. The enclosures are being treated as Security Related, Proprietary, and Export Controlled Information, as appropriate.

The listing will be used to support the review of the ISA Annual Update, which has been assigned Technical Assignment Control Number L33204. Please reference this number in any future correspondence associated with this submittal.

This review is separate from any inspection effort associated with the ISA Project, and its scope is directed at compliance with Title 10 of the *Code of Federal Regulations* (10 CFR) 70.72(c).

Based on our preliminary review and projection of current internal schedules, we anticipate completing the review by the end of June 2012. This date could change depending on the findings of our technical review, urgent assignments, or other factors. We will promptly communicate any significant changes to this schedule.

In accordance with 10 CFR 2.390(d) of the U.S. Nuclear Regulatory Commission's (NRC's) "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room). The enclosures to your letter will be withheld from the public.

If you have any questions regarding this matter, please contact me at (301) 492-3128 or via e-mail to Merritt.Baker@nrc.gov.

Sincerely,

/RA/
