North Little Rock, AR 72114

SUBJECT: NRC INSPECTION REPORT 030-34325/12-002(DNMS) – VA MEDICAL
CENTER, ORLANDO, FLORIDA

Dear Mr. Williams:

On January 4, 2012, the U.S. Nuclear Regulatory Commission (NRC) conducted a routine inspection at the VA Medical Center in Orlando, Florida. The inspection was limited to a review of activities authorized under Permit Number 09-00675-01. The inspector conducted an exit briefing with the staff at the Medical Center at the completion of the inspection.

The inspection was an examination of activities conducted under the Permit as they relate to radiation safety and to compliance with the Commission's rules and regulations. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, independent measurements, and observation of activities in progress. Within the scope of these inspections no violations of NRC requirements were identified; therefore, no response to this letter or the enclosed NRC Form 591M is required.

In accordance with Title 10 Code of Federal Regulations 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

G. Williams
