Subject: Correction to NRC Safety Evaluation for Waterford
Containment SCV Hatch Repair
Attachments: Page Correction to NRC SE on W-3 IWE-5521.pdf; Notes for
Corrections to NRC SE of 1-4-12.doc

Kaly,

The NRC issued a Safety Evaluation dated January 4, 2012 for the Waterford ASME Code Alternative to IWE-5521. However, in review of the SE there are several statements that do not represent the Waterford steel containment hatch design or Code Alternative Request. I am providing a markup of the SE pages as well as an explanation of the concerns. Entergy believes that these statements should be revised to allow Entergy to appropriately use the Code relief. Let me know if you have any questions.

Thanks

Steve A Bennett
