Subject: A citizen in Asheville,N.C. voicing the opinion/request that

all permits be denied concerning the proposed William States Lee III nuclear station in Gaffney just 60 miles from Asheville. Nuclear is not the way to go as Fukyshima is one obvious example of this. Mining of uranium is deplorable and the water to cool reactors is wasteful and never anywhere to store the waste. Now's the time for conservation and developing renewables and efficient use of existing and soon to be available green sources. Thank You for your time, M.Atanasoff. Asheville, NC
