Dale,

I did receive the map that you sent and I also have a hard copy of the Commodity Flow Study. I will take care of it from here and make sure Greg gets it (and the electronic map). I also have the MPO meeting minutes and notes that Dan and I sat in on.

Again, thank you very much for your hospitality last week and assisting us with our meeting with the Port of Victoria, the large meeting in your office with the local stakeholders, and getting us with Judge Pozzi. Pat, Dan, Greg, and I really appreciated all the help.

The trip report that NRC will create will be available within the next few months detailing our activities down in Victoria along with the other activities done by the Victoria ESP team. If you would like to be on the distribution list for the trip report, the Draft EIS, and any other documents/activities, please let the NRC project manager, Tomeka Terry, know and she will put you on the list.

All the best,

Michael Purdie

Michael, when I tried to forward this document to you on Tuesday I received a notice that the transmission was rejected. I gave you the hard copy while you were in our office. Please let me know if you need the file electronically. If you do we may need to figure out another way for you to get it. The file is about 10 MB. Just let me know... Dale

Dale:

Here is an electronic version of the HazMat Commodity Flow Study. It was good to see you this morning.

Attached is the final HMCFS report for Victoria County. We've added information about previous year traffic levels for road and rail, made comparisons to the 1996 report information, and added a listing of placard numbers observed by site. We'll be sending the raw data in Excel format separately next week. Please let us know if you have any questions about the report. We enjoyed working with your group and are interested in how this information gets implemented for Victoria City/County in the future; we hope you can keep us posted.

Sincerely,

David Bierling
