Ron,

Here is the update that you requested;

Our New Mexico Peña Ranch LOI remains accurate. We still plan on submitting a license application for a conventional mill by end of fiscal year 2012. As for the Gas Hills, Strathmore now intends to submit a application for a heap leach operation in the first quarter of 2013. Attached is an amended LOI for your records. Let me know if you need anything else.

Juan

Juan:

Can you give us a brief status on these two projects and update the LOI's, if necessary?

Thanks

Re: Amendment to Notice of Intent to File a License Application
Gas Hills Project

Dear Mr. Miller:

This is to further amend Strathmore Minerals submittal to the U.S. Nuclear Regulatory Commission (NRC) of its intent to submit a license application for a heap leach facility to be located at its Gas Hills properties in Fremont County, Wyoming. The NOI for this project was submitted to NRC on March 21, 2008 and amended on March 18, 2009 and November 19, 2010. Please note that we currently anticipate submittal of the license application in the first quarter 2013.

If you have any questions or require additional information, please feel free to contact me at my office at 505-474-6696 or via e-mail at jvelasquez@strathmoreminerals.com.

Sincerely,

A handwritten signature in black ink, appearing to read "Juan R. Velasquez", with a long, sweeping horizontal line extending to the right.
