RE: Requesting 60-day extension on public comment period for "Background and Preliminary Assumptions for an Environmental Impact Statement – Long-Term Waste Confidence Update,"

Dear Dr Pineda and NRC decision-makers:

For many years our organizations have been closely tracking and involved in issues related to irradiated fuel and high level radioactive waste from nuclear power, weapons and reprocessing. Several of us participated in what we understand was a related meeting a few months ago at NRC in Rockville on this matter. There was confusion at that time about some of our comments being "outside the scope" of that meeting. Since this is a preliminary scoping for an Environmental Impact Statement, we would like the chance to suggest what we believe and understand makes sense for the scope of such an EIS.

The assumptions underlying the waste confidence decision are extremely important and we would like 60 days extra time to provide our comments.

Very Sincerely,

Diane D'Arrigo
