Report of Event – Used Oil Accumulation

Dear Sir or Madam:

On October 14, 2011 Global Nuclear Fuel – Americas L.L.C. (GNF-A) submitted a 30 day written report in response to Event Notification 47269 (Reference 3). The immediate and near-term corrective actions and one of the longer term preventive actions have been completed for this event.

The second longer term preventive action was to modify the decontamination area oil accumulation processing equipment with a scheduled completion date of February 29, 2012. The processing equipment design and modifications are taking longer than anticipated. As a result, GNF-A is submitting a revised scheduled completion date as shown.

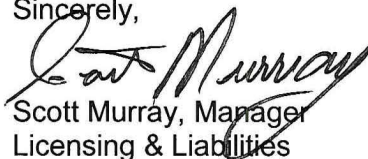

Longer-term Preventive Actions

Modify the decontamination area processing equipment to improve used oil criticality safety controls.

Scheduled complete: June 30, 2012

If you have any questions regarding this matter, please contact me at (910) 819-5950.

Sincerely,

Scott Murray, Manager
