Dear Distinguished NRC Members,

Now and going forward America and the world must spend our funds on Green, truly clean energy. All nuclear power plants leak dangerous substances, radioactivity and heat. The nuclear waste cannot be dealt with in any good way. No more nukes, please!

There are truly green solutions. There are other options. I truly believe that going forward into our future with nuclear power is horribly wrong.

May you be blessings to this world.

May God bless you each one,

Ms Deborah Acs
