Subject: Things are quiet

We have one issue coming regarding licensee and VT State sampling in the CT River. Split sample on Nov 3 results came back with 1120 pci/l (State) and 1230 pci/l (licensee). Subsequent samples on later dates < MDA. Ron Nimitz will provide more detail soon. State does not plan to release results until they do analysis of results. SLOs etc aware and have talked to VT.

Good call with DD/DDDs of DORL, DE, DLR, DRS and DRP and staff on ASR. We will brief you on plan going forward.

Exit with Pilgrim on 4 Med App vio and 1 proficiency APP vio (and one green finding on exam difficulty) went well. Lots of dialog. Operators present to hear message on maintaining their license.
